

Timothy Jelinek

The language I am choosing to study is JavaScript. JavaScript is very popular and is known for being the scripting language for web pages. I chose JavaScript based on its popularity and the fact that there is a lot of reputable information online about it. It is one of the first languages I touched and learned about, and I plan to learn more about it in the future. JavaScript is a core piece when building websites, and I don't believe it is going away anytime soon.
