RE: Junior Front-End Developer

Dear Hiring Manager,

I am applying for the position of Junior Front-End Developer as listed on LinkedIn. My intention is to start my career path in web development, and this position seems perfect for my professional goals.

I am about to graduate from Gateway Technical College with a degree in web software development. During my studies I've learned multiple coding languages including many of those listed in your job posting, most notably CMS, HTML, and CSS. Gateway has also provided opportunities to work with real clients on real websites hosted on Ghost.io and WordPress. The most recent success in my education is a certificate for Full-Stack web development which is very useful for this role.

Thank you for your time and consideration. I look forward to hearing from you about this opportunity. I am excited about the opportunity to discuss my qualifications and experience in more detail during an interview.

Sincerely,

Timothy Jelinek
