

8/31/2023

The screenshot shows the SQL Server Enterprise Manager interface. The top toolbar includes buttons for 'Execute' (a green play icon), 'Save' (a floppy disk icon), and other standard database tools. Below the toolbar, the 'SQLQuery1.sql - VP...80 (S21454780 (53))' window is active, displaying the following SQL code:

```
create table phone_detail (phone_number varchar(30), first_name varchar(30), last_name varchar(30), middle_name varchar(30))

drop table phone_detail
```

The left sidebar shows the 'Databases' folder expanded, with '1902ASQL01\sqlstudent1 (SQL)' selected. The main area displays the query text.

One course can have many classes and a class belongs to only one course.

One class can have many students and a student belongs to only one class.
